

## The Zoological Society of San Diego

January 24, 2001

Dear Working Group Member:

Thank you again for the time and effort you devoted to the Working Group process during the year 2000. This process was beneficial to the Zoological Society because the input we received from you will result in a better plan for the Zoo and for Balboa Park.

I wanted to let you know what the next few months will hold with respect to the plan for the San Diego Zoo. Currently, Zoological Society staff and technical and land use consultants are analyzing the input received through the Working Group process and the design charrette. This information will be used to develop plan options which we will then study to determine their financial and engineering feasibility as well as their impact on Balboa Park.

The Society's review of options will likely take a few months. Even though you may not immediately hear from us, the Zoological Society is committed to working with you in order to keep the community involved. We will be back in touch with you to share what we have developed prior to submitting our plan to the City of San Diego.

Sincerely,

Douglas G. Myers  
Executive Director  
Zoological Society of San Diego

Board of Trustees

Kurt Benirschke, M.D.
